DETAILED ACTION

Allowable Subject Matter

The following is an examiner's statement of reasons for allowance:

The prior art fails to teach an apparatus, method and computer readable which in combination teach

The claimed invention is allowable based in part on the following features. The claimed method and system is programmed to get a GR list and then match the invoice number with a fit GR number.

Also, it gets the QI number by the fit GR number, gets QI information by the QI number. End users (accountants) can preview the matching results, then just push the "post all" button to post all A/P documents.

These steps are embodied in the following claims language:

transferring a payment control key from the payment configuration module to a goods receiving (GR) module;
transferring a GR list of the PO number from the goods receiving module to a GR-IR matching configure module;
matching the invoice number against a GR number and transferring the GR number from the GR-IR matching configure module to a quality management module;
transferring a quality inspection (QI) number of the GR number from the quality management module to a document posting checking configure module;
checking, at the document posting checking configure module, QI information using said QI number;
posting an accounts payable document and transferring payment information from the document posting checking configure module to a vendor management module; and
sending the payment information from the vendor management module to a vendor.

Representations of prior art include:

US Patent 5953707, EP 1361531, and SAP documentation of record.

Art Unit: 3693

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
